

THE CHEAT IS ON! Democrats Reveal Their Plan to Use Overseas Ballots to Win in 2024 — Here's How Easy It Is to Cheat — Are Republicans Really Going to Let This Happen?

[GP thegatewaypundit.com/2024/09/cheat-is-democrats-reveal-their-plan-use-overseas/](https://thegatewaypundit.com/2024/09/cheat-is-democrats-reveal-their-plan-use-overseas/)

Sep. 22, 2024 3:40 pm

Politico on Saturday announced that Democrats were going to focus on the “overseas voters” or UOCAVA votes to seal a victory in 2024.

Politico also regurgitated the completely fraudulent figure that there are 1.6 million UOCAVA voters from swing states in this year's election – a completely dishonest number.

The Gateway Pundit was first to warn Republicans about this appalling scam that will allow Democrats to easily steal the 2024 election.

Patty McMurray reported on the UOCAVA scam back on September 6th.

We are republishing here for those of you who missed how easy it is to steal an election with UOCAVA or “overseas” voters.

Are the Democrats telegraphing one of the key ways in which they could steal the upcoming election?

In the 2000 presidential election, a mere 629 votes separated the race between George W. Bush and Al Gore in Florida. When the absentee overseas votes finally arrived, George W. Bush was able to take the 537-vote lead from Al Gore and win the presidency.

Democrats paid attention.

Are Democrats really interested in attracting more overseas voters, or is it the flawed voter registration system they use that could be a game-changer in our upcoming election if properly utilized by unscrupulous election officials?

On August 12, 2024, the DNC released a memo announcing it would spend **six figures** to collect up to **9 million Democratic votes from overseas**.

The image shows the top portion of the DNC website. On the left is the DNC logo, a blue circle with a white 'D'. To its right is a navigation bar with five links: 'WHO WE ARE', 'WHERE WE STAND', 'TAKE ACTION', 'VOTE', and 'SHOP'. Below the navigation bar is a large, bold headline in dark blue text: 'DNC Announces Innovative Six-Figure Investment in Democrats Abroad To Ensure Engagement of Key Voters Living Outside U.S.'. Below the headline, in a smaller, all-caps font, is the date 'AUGUST 12, 2024'.

WHO WE ARE WHERE WE STAND TAKE ACTION VOTE SHOP

DNC Announces Innovative Six-Figure Investment in Democrats Abroad To Ensure Engagement of Key Voters Living Outside U.S.

AUGUST 12, 2024

The DNC clearly states its goal in their memo:

For the first time ever in a Presidential cycle, the DNC is investing in Democrats Abroad.

The DNC is doing the work to win in battleground states across the country.

With under 100 days until Election Day and ahead of the Democratic National Convention, the DNC announced a significant six-figure investment in Democrats VoteFromAbroad, for the first time ever in a Presidential cycle, ***helping fund their efforts to win the votes of approximately 9,000,000 Americans***— of which only about 8% are registered voters from 2020 – who are living or serving outside of the United States.

Here's the problem with the DNC's stated goal:

The DNC's stated goal of winning the votes of approximately 9 million Americans through its Democrats Abroad website seems impossible, given that according to a recent report by the federal government, only **4.4 million US citizens reside overseas**, and only **2.8 million of those are of voting age**.

Reuters recently wrote about the DNC's plan to spend \$300,000 to register "9 million" UOCAVA voters leading up to the 2024 election. According to the government website FVAP, there are only 2.8 million eligible UOCAVA voters. Let's assume that half of those eligible voters would vote Democrat (a generous assumption given the state of the US economy); that's only 1.4 million eligible voters in the 2024 election. The 1.4 million number doesn't account for how they would vote or even if they would vote, given that a meager number of eligible overseas voters actually vote.

Curiously, the DNC memo claims that "**over 1.6 million Americans** from the battleground states of Arizona, Georgia, Michigan, Nevada, North Carolina, Pennsylvania, and Wisconsin" live overseas, adding that they plan to "fight for every vote."

They share the chart with their UOCAVA population estimates for each battleground state.

Battleground State Population Abroad:

State	Abroad Population Estimate
AZ	197,299
GA	293,312
MI	264,256
NC	288,831
NV	84,502
PA	340,840
WI	156,096

Screenshot

The total number of swing state voters in the Democrat chart comes out to **1,625,136** voters.

The US government says there are **2.8 million** total overseas eligible US voters.

Democrats want you to believe that over half of those eligible overseas voters have residence in the crucial swing states! That is absurd!

The DNC reminds everyone in their memo of how close the 2020 election results were (that no one was allowed to question) and why they're not going to leave anything to chance in 2024:

In 2020, just 44,000 votes across Arizona, Georgia, and Wisconsin votes won Joe Biden the presidency. In fact, abroad voters made a notable difference in Georgia and Arizona during the 2020 presidential election and made the difference in close races in Connecticut, New Hampshire, and North Carolina during the 2022 midterms. That's why the DNC is doing the work to win this election by reaching out to voters regardless of where they live.

Note: It's so much easier to register UOCAVA voters than voters who plan to vote in the USA.

This is the perfect solution for a party looking to bulk up the voter rolls with potentially non-existent voters in advance of the 2024 election.

The Uniformed and Overseas Citizens Absentee Voting Act (UOCAVA) allows online voter registrations *without verification of identity or citizenship status*.

US Citizens in the USA who would like to register to vote must share the last four digits of their social security number and/or provide a driver's license or state-issued ID.

UOCAVA voters, however, *can bypass the requirement* to share the last four digits of their social security number and/or provide a driver's license or state-issued ID.

The screenshot below shows how the Democrat Party website, much like the federal government's website, registers UOCAVA voters to vote in US elections and allows the user to bypass the ID portion of the online registration process.

Vote from Abroad.org
Absentee Ballots for U.S. Citizens

Register to vote and/or request your ballot

For Michigan

What you'll need:

- Your US voting address and ZIP code.
Optional: [Search the USPS ZIP Code database.](#)
- Your current, non-US address.
- Your social security number (if you have one) 

Why am I being asked this?

 If you have a Social Security Number, you must provide the last 4 digits. If you don't have a Social Security number, you can provide a state driver's license or other state identification card. If you don't have either, check the box that indicates "I don't have the above identification." Most states will accept the form without a Social Security Number or state identification card. If your state requires further information, your election official will contact you.

Screenshot

UOCAVA opens the door to unlimited foreign voter voting.

Here are a few additional details about UOCAVA voters who register to vote on the FAVP or Federal Voting Assistance Program application (a federal government website) or the Democrat-funded website VoteFromAbroad.org:

- Applicants *may choose any state or address* they wish to vote in.
- *No one verifies that these registrants ever lived at the address they list or that they have any connection to that state.*

In their memo, Democrats share a chart outlining the number of estimated voters they plan to work to register in each battleground state before the 2024 election.

Battleground State Population Abroad:

State	Abroad Population Estimate
AZ	197,299
GA	293,312
MI	264,256
NC	288,831
NV	84,502
PA	340,840
WI	156,096

Democrats Abroad has been on the forefront of engaging Democrats across the world via their own get out the vote efforts and the online portal votefromabroad.org which helps people register to vote from abroad and provides a lengthy FAQ and trained voter support team to support them.

We've highlighted Michigan because Phani Mantravadi, founder of CheckMyVote.org, has provided data to the Gateway Pundit that reveals the number of UOCAVA registered voters(so far) in 2024 to give us a better understanding of the reality of the DNC goal of registering 264,256 UOCAVA voters in the state of Michigan.

According to Check My Vote founder Phani Mantravadi, as of September 5, 2024, 9,872 of the 11,098 UOCAVA registrations added to the MI QVF since January 2024 were flipped from non-UOCAVA voters to civilian (C) or military (M) voters. Only 1,226 registrations were new UOCAVA additions.

The following table shows the number of UOCAVA registrations in the Michigan's voter roll from January 2024 compared to that of September 2024

QVF Snapshot	UOCAVA		
	Overseas Civilian	Military	TOTAL
January 2024	270	54	324
September 2024	9361	1737	11098
Net Add	9091	1683	10774

Out of the 11098 total UOCAVA status registrations as of September 2024

- 9872 registrations were flipped from UOCAVA status N (denoting NON-UOCAVA) to C or M
- 1226 registrations were new UOCAVA additions

Screenshot

The Check My Vote, founder, also used Michigan's QVF (qualified voter files) to verify data that reveals that in 2020, Michigan miraculously registered an astounding 25,857 UOCAVA voters as citizens returning to the US during the COVID-19 pandemic. 19,102 of those registered voters were overseas civilians! (see chart below)

By April 2021, 25,308 of the registered UOCAVA voters were curiously switched to non-UOCAVA status, while the status of 231 registered UOCAVA voters remained unchanged. (see CheckMyVote.org chart below).

How did 25,308 UOCAVA voters *suddenly flip to non-UOACAVA (permanent) voters in only five months?*

Since the voting requirements for UOCAVA voters are much more relaxed, how can Michigan residents be sure the 25,308 former UOCAVA voters, who are now considered permanent voters on Michigan's QVF, are legitimate voters?

The following table shows the number of UOCAVA registrations in the Michigan's voter roll from November 2020 compared to that of April 2021

QVF Snapshot	UOCAVA				
	Overseas Civilian	Military	TOTAL	UOCAVA Status Unchanged	Changed to Non-UOCAVA
November 2020	19316	6541	25857		
April 2021	214	104	318		
Net Changed	-19102	-6437	-25539	231	25308

The drop of 25539 UOCAVA C/M registrations comprises of:

- 25308 registrations changed to NON-UOCAVA status while their voter status remained ACTIVE
- 231 registrations retained their UOCAVA C or M status

Michigan does not allow the electronic return of ballots, but nearly 8,000 ballots were received and processed in violation of the law in the past election.

Was this a trial run?

Could the DNC be citing the 9 million number and setting it as a target goal to cultivate public acceptance of that inappropriate number? In the federal government's own words, "There is no registry of overseas citizens."

So, who is going to stop nefarious recruitment contractors from enlisting foreign voters in the amount the DNC needs to win November's election? After all, registrations can be made online, ballots can be emailed to recipients who can be anywhere, and some states allow electronic ballot returns.

Clearly, non-citizen voting is a Democrat strategy.

They cannot win without it, and the Republicans cannot win if they don't do something to stop it.

Every state has the responsibility to voters to verify these applications.

Despite citizens flocking home to America's shores in 2020 due to fears of COVID-19, non-military UOCAVA voters skyrocketed as high as 573,000 from 2016 numbers of around 228,000. Meanwhile, military overseas voters dropped to 37% of total UOCAVA voters.

A significant discrepancy exists between government agency reports to Congress regarding the number of non-military UOCAVA voters. In 2020, the DOD reported 224,139 non-military UOCAVA voters; the Election Assistance Commission reported 573,000. **The 349,000 difference compounds when a person considers that UOCAVA voters may select ANY address to serve as their domicile residence of record, even if they never lived at that address.**

Agency Report to Congress	Non-Military UOCAVA Voters
Department of Defense	224,139
Election Assistance Commission	573,000
Discrepancy	349,000

Per the Federal Voting Assistance Program, FVAP, an overseas non-military voter may claim an address of domicile “even if you have not physically been present at that address.”

Plus, questions exist as to whether citizenship is even verified. Social security number? Voter ID? Not required. “In Section 6 of the form, under ‘Additional Information,’ write that you do not have a Social Security Number or a state-issued ID.”

In a pivotal turn of events, Pennsylvania citizens recently lodged a formal complaint against the Pennsylvania Department of State (DoS), alleging violations of federal election laws. Pennsylvania Fair Elections (PFE) asserts that the DoS’s failure to verify overseas voter identities violates the federal Help America Vote Act of 2002 (HAVA). The alarming allegation suggests that the DoS has routinely instructed election officials to sidestep federal standards and open the door to overseas ballot fakery.

During a one-hour online media conference, PFE founder Heather Honey and attorneys Erick Kaardal and Elizabeth Nielsen, who are representing the case, raised serious concerns regarding the potential erosion of military votes and the integrity of the electoral system.

Honey, an investigator with Verity Vote, presented a slide presentation explaining how the Pennsylvania DoS is essentially enabling anyone, anywhere, to cast any number of ballots into the pool of genuine ones. “Verification of information is the law,” she emphasized.

Attorney Erick Kaardal, a partner at Mohrman, Kaardal & Erickson, P.A., the law firm representing the case, said, “It’s not too much to ask state officials to follow federal law.” The prominent attorney has built his 30-year career suing the government on behalf of regular people. Kaardal has won two US Supreme Court cases and chalked up more than 61 election integrity victories.

This article was co-written by Investigative Journalist for the Gateway Pundit Patty McMurray and Patrice Johnson of MI Fair Elections. Phani Matravadi of Check My Vote supplied data related to the MI QVF, which Data Analyst Tim Vetter reviewed.
